Plan of presentation

-  About company
-  Fields of activity
-  Employees
-  Clients
-  Projects

Year of foundation is 1997. Since 2002, the main focus of the company is the implementation of the latest developments in the field of architectural and building acoustics, and the solution of typical problems of sound insulation in industrial and civil construction.

Group of companies named ACOUSTIC was organized in Kiev in 2003. It includes production and trading company "Acoustic Traffic", the acoustic design company "Acoustic Materials and Technologies", finance and investment company "Acoustic Trend" (registered in England), engineering and construction unit. Today group of companies ACOUSTIC is a market leader in the field of sound insulation and room acoustics and works throughout the territory of Ukraine.

Company "Acoustic Materials and Technologies" developed several methods of vibration isolation of heavy engineering equipment, industrial installations and basements of houses which provide successful solution of vibration protection problems.

The company has formed an integrated approach to solving the problems of sound insulation and room acoustics. This approach is a wide range of acoustic services ranging from free consultations in the office to in-situ measurements at the customer's premises and conduct a full range of acoustic design.

Fields of activity

- Acoustic consulting
- Manufacturing
- Trading
- Engineering

Acoustic consulting

- Development of acoustic designs
- Production of technical documentation
- Field supervision
- Implementation of on-site acoustic measurements

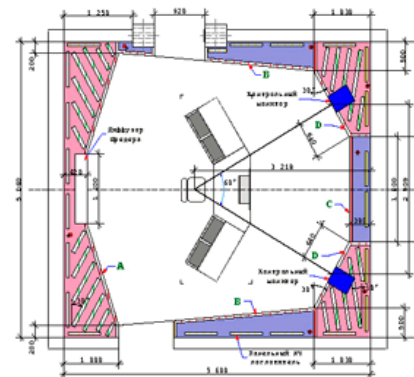

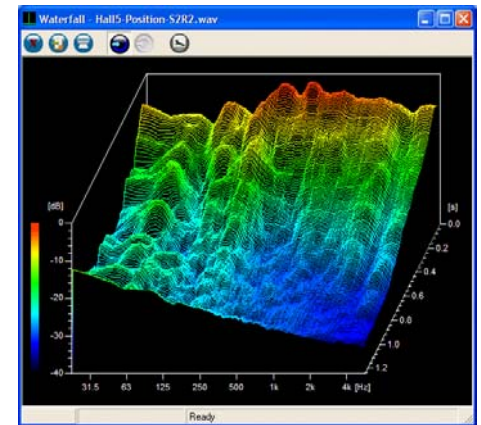

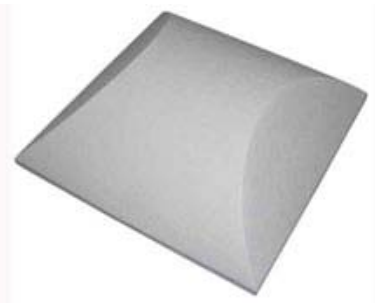

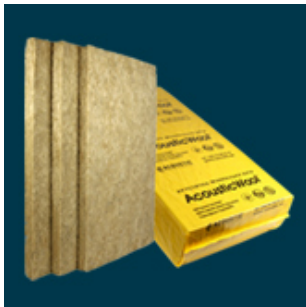

Рис.8 Схема расположения звукоизоляционных конструкций

Manufacturing

- Vibrofix[®] sound isolation mounts
- Sound isolation metal profiles
- Anti-vibration mounts
- Acoustic mineral wool board AcousticWool[™]
- Acoustic diffusers

Vibrofix

АКУСТИЧНА МІНЕРАЛЬНА ВАТА
AcousticWool[®]

Trade and distribution

Knauf Systems
Cleaneo Acoustic Ceilings

- Sound isolation constructions
- Sound absorbing materials
- Decorative acoustic panels
- Materials for vibration isolation

Engineering

- Installation of sound insulation constructions
- The construction of recording studios, home theater, etc.
- Room acoustic treatment

Employees

The company's staff - are highly skilled sound engineers with years of experience in the field of architectural physics, which allows you to successfully solve complex acoustic problems.

Dozens of recording studios, cinemas, restaurants, clubs, bowling, sports facilities, entertainment and shopping complexes, multi-storey apartment buildings, office centers are built on the basis of the projects developed by our professionals.

Memberships:

AES (Audio Engineering Society)

ASA (The Acoustical Society of America).

Clients

- Project and design companies
- Architect's offices
- Building companies
- Developers
- Design departments
- Private customers

Projects (short overview)

“Arkada” Bank, Kiev

President-Hotel, conference hall, Kiev

Hotel Radisson SAS, Kiev

Residential complex “Silver Breeze”, Kiev

Residential complex
“Triumph”, Kiev

Premier Palace Hotel, Kiev

Projects (short overview)

Leonardo office center, Kiev

UkrAvto office center, Kiev

Millenium office center, Kiev

Iceberg office center, Kiev

Parus business centre, Kiev

Kyivstar office center, Kiev

Podol Plaza office center, Kiev

Projects (short overview)

Donetsk-City multiplex, Donetsk

Blockbuster multiplex, Kiev

Buddha Bar, Kiev

Jumbo bowling club, Kiev

Storm bowling club, Kharkov

Pioneer ice club, Kiev

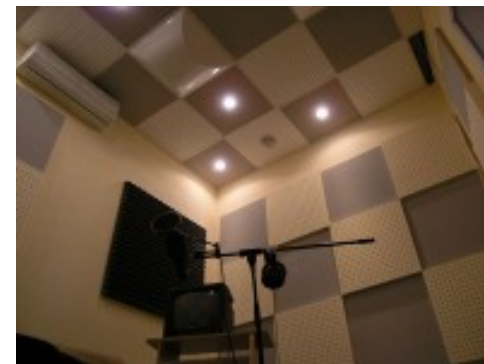

Projects (short overview)

Star Media recording studio, Kiev

Talent Music recording studio, Kiev

Private recording studio, Kiev

TV newsroom, Channel K-1, Kiev

Fashion-TV Ukraine show-room, Kiev

Home Theater, Kiev
